Packing Fruits for Long Distances.

A correspondent of the Cottage Gardenor describes the following method for packing fresh fruits of various kinds .cess for twenty years, and he has sent fruit from distances varying from fifty to the State, five hundred miles :

Take a box, soft paper and sweet bran. A box is chosen in size according to the quantity to be sent. A layer of bran is put in the buttom, then each bunch of grapes is held by the hand over a sheet of paper; the four corners of the paper brought up to the stalk and nicely secured; then laid on its side in the box, and so on till the first layer is well finished, . Then fill the whole over with bran, and give the box a gentle shake as you proceed. Begin the second layer as the first, and so on until the box is completed .-Thus with neat hands the bloom is preserved, and may be sent to any distance; But with clumsy hands, quite the contrary, and often an entire failure, as the putting in and taking out of the box are the most important points to be observed. I have invariably packed sixty to eighty bunches of grapes, and fifty or sixty dozens of peaches or apricots in one box, and received letters from persons who said they had arrived as safe as if they had been taken from the trees that morning.

The famous crops of Central Virginia seem to be a failure this season. --- Great folly-To think of build

ing a 'Pacific' Railroad in time of War! --- Southern Illinois, it is stated, will this year send to market between five and ten thousand bales of cotton.

--- The Sultan recently gave the Prince of Wales a pipe worth \$15,000. "Put that in your pipe and smoke it." --- The iron gunboat business is go-

ing on bravely. Four new vessels of the kind are to be built forthwith; at this port three, and one at Boston.

--- The works on the Isthmus of Sues are urged on energetically. There are THE upwards of twenty-five thousand men at present employed in cutting the canal. The number of persons in Mas-

sachusetts over hundred years of age, as shown by the census, was 13. Whites, 9; colored, 4; males, 4; females, 9.

Wool is now higher than it has been for forty-four years. This is owing to the large demand for army goods, and to the advanced price of cotton. It will not fall so low as it has been of late years and we shall be surprised if the flocks on our hills are not greatly increased.
